CrunchBite Corp — Enterprise Domain Context

About the Organization

CrunchBite Corp is a fast-casual QSR (Quick Service Restaurant) chain operating **680 corporate stores** and **320 franchise locations** across North America, with international expansion underway in the UK and Australia. The brand processes approximately **2.4 million transactions per day** across dine-in, drive-through, mobile order-ahead, kiosk, and delivery channels, generating approximately **$3.8 billion in annual revenue**.

CrunchBite's technology organization is structured into three product teams that share a common platform:

- **Digital Ordering Team** — guest-facing mobile, web, and kiosk ordering experience
- **Loyalty & Rewards Team** — CrunchRewards programme, personalised offers, and member engagement
- **Kitchen & Operations Team** — in-store kitchen display, speed-of-service, and store operations tools

All three teams build on a shared AWS microservices platform, a common event bus (Apache Kafka on MSK), and a central identity layer (AWS Cognito).

Enterprise User Personas

Persona	Team	Description
Guest (unauthenticated)	Digital Ordering	Walk-in customer ordering at kiosk or counter; no account required
Member	Digital Ordering / Loyalty	Loyalty programme participant with a CrunchRewards account
Kitchen Staff	Kitchen & Operations	Prepares orders; interacts with KDS hardware
Drive-Through Attendant	Kitchen & Operations	Takes and hands off drive-through orders
Store Manager	Kitchen & Operations	Manages one corporate store; holds void/refund authority
Franchise Owner	Kitchen & Operations	Owns 1–15 franchise stores; monitors performance dashboards
Marketing Manager	Loyalty	Corporate marketing team; manages campaigns and segments
Franchise Business Consultant (FBC)	Kitchen & Operations	CrunchBite field rep supporting multiple franchisees

---

Corporate + Franchise Model

- **Corporate stores** (680): operated directly by CrunchBite Corp; all technology mandated

- **Franchise stores** (320): independently owned under a franchise agreement; use the same POS, KDS, and ordering stack; price overrides permitted within ±10% of the corporate price book
- Franchise owners receive a separate dashboard with multi-store roll-up views; they cannot modify menu data or corporate LTOs
- **Franchise Business Consultants (FBCs)** each manage a territory of 15–30 franchise stores and require aggregated compliance and performance views

---

Company-Wide Business Rules

1. A member may apply **one offer per order**; offers are single-use and expire on the campaign end date
2. Points earned on an order are **held for 24 hours** before posting (fraud hold); refunded orders forfeit points
3. **86-ing** (marking an item unavailable) must propagate to all ordering channels within **60 seconds**
4. Store managers may void orders up to **$75 without approval**; above $75 requires a district manager PIN
5. Delivery orders received **after store close time minus 15 minutes** are auto-rejected with guest notification
6. Catering orders require a **4-hour lead time** and a minimum of **10 items**
7. A franchise store's price override must stay within **±10%** of the corporate price book value
8. All in-store POS transactions must be confirmed with **Oracle MICROS** before being marked `COMPLETE`

Company-Wide Compliance & Regulatory Framework

PCI DSS v4.0

- Cardholder data handled exclusively by **Adyen**; CrunchBite systems are SAQ-A scope
- Tokenization: Adyen returns a reusable network token per saved card; stored in Loyalty Service
- 3DS2 required for all card-not-present transactions above $25

CCPA / US State Privacy Laws

- Members may request data export, correction, or deletion
- Marketing opt-out must be honoured within 15 business days
- "Do Not Sell or Share My Personal Information" link required on all web properties

Allergen & Nutritional Labelling

- **US**: FDA menu labelling rule — calorie counts mandatory on menus at chains with >20 locations
- **UK**: Natasha's Law — full ingredient and allergen list mandatory on all packaged items
- Per-item allergen data sourced from **Infor CloudSuite Food & Beverage (PIM)**; displayed on kiosk, app, and web

Accessibility

- WCAG 2.1 AA on all web and mobile interfaces
- ADA kiosk compliance: accessibility mode activates via physical button; JAWS-compatible
- UK Equality Act 2010 equivalent standard for UK digital properties

---

Enterprise Integration Landscape

System	Purpose	Owner Team
Oracle MICROS POS	In-store point of sale, order management, receipt, tax engine	Kitchen & Operations
Adyen	Payment processing across all channels	Digital Ordering
Braze	Customer engagement, push/email/SMS campaigns, A/B testing	Loyalty
Otter	Delivery aggregator middleware (Uber Eats, DoorDash, Grubhub)	Digital Ordering
Epson KDS	Kitchen display system hardware	Kitchen & Operations
Infor CloudSuite F&B	Inventory, procurement, recipe management, allergen/nutrition PIM	Kitchen & Operations
Revel Systems	Kiosk software layer (wraps MICROS)	Digital Ordering
Medallia	Guest satisfaction survey and NPS	Kitchen & Operations
Snowflake	Enterprise data warehouse; analytics and franchise dashboards	All teams (read)
Tableau	Franchise and operations dashboards	Kitchen & Operations
Google Maps Platform	Store locator, delivery radius, ETA	Digital Ordering
LaunchDarkly	Feature flags — gates LTO activations and new features per store	All teams
