Heritage Bank — Retail Banking Team: Domain Context

Team Scope

The Retail Banking Team owns the **consumer digital channels** — mobile banking app (iOS + Android) and online banking portal — serving Heritage's 1.2 million retail customers. The team covers personal account management, retail transfers and payments (ACH, Zelle, RTP, bill pay, wire initiation), card management, and consumer account opening via Blend.

Team Personas

Persona	Description	Key Needs
Retail Customer	Individual account holder; primary user of mobile and online banking	Balance and transaction history, transfers, card controls, statements, alerts
Carer / Joint Account Holder	Secondary account holder (joint account)	Same digital access as primary; separate login credentials
Branch Teller	In-branch staff; performs transactions on behalf of retail customers	Look up customer by account or SSN; initiate transfers; override holds; view transaction history
Customer Service Agent (CSA)	Phone and chat support	Read-only account view; initiate refunds; raise Salesforce service cases

---

Retail Account Management

- **Accounts displayed**: Checking (DDA), Savings, Money Market, CD, HELOC, Personal Loan
- **Balances**: always shows AS/400 **available balance** (real-time via FiServ API); never shows book balance (ledger, updated at EOD batch)
- **Transaction history**: up to 24 months displayed digitally; older transactions available on branch request
- **Statements**: PDF download for last 24 months; older statements via branch request
- **CD maturity management**: 60-day, 30-day, and 7-day alerts before maturity; customer can instruct rollover or withdrawal via the portal within the alert window
- **Account nicknames**: customers can rename accounts for display (e.g., "Vacation Fund")
- **Regulation D**: Savings account withdrawal limit (6 per statement cycle) displayed on account detail screen; customer warned when approaching the limit; AS/400 enforces the hard stop

---

Retail Transfers & Payments

Payment Type	Settlement	Key Rules
Internal transfer	Real-time (FiServ API)	Between Heritage accounts; posted immediately; reflected in available balance instantly

ACH external (next-day)	Next business day	Submitted to FedACH via BIH; cut-off 8 PM CT; returned items at 10 AM or 2 PM CT
ACH external (same-day)	Same day (SDIE)	Cut-off 2:30 PM CT; $25,000 per-transfer limit
Zelle (P2P)	Real-time (EWS)	15-minute hold on first payment to a new recipient; max $2,500/day; no AS/400 pass-through
RTP (Real-Time Payments)	Sub-5-second (TCH)	Instant settlement; no rollback once submitted; max $100,000 per transaction
Bill Pay (CheckFree)	1–5 business days	Payee management; scheduled and recurring payments; Heritage sends payee data, CheckFree disburses
Wire (Fedwire / SWIFT)	Same day (domestic) / 1–5 days (international)	Wire initiation via retail portal; processing by Wire Desk (see Commercial team for dual-auth rules)

Overdraft Protection

- Customers may enroll in overdraft protection: auto-transfer from a linked savings account (max 3/day)
- NSF (insufficient funds) fee notification sent immediately via push and email

---

Card Management

Feature	Detail
Lock/unlock	Instant debit card lock/unlock via FIS Worldpay API; reflected in app within 3 seconds
Travel notice	Customer sets date range and destination countries; sent to FIS Worldpay to suppress foreign transaction alerts
Spending controls	Daily ATM limit and daily POS limit (within FIS Worldpay card programme rules)
Lost/stolen replacement	Self-service card replacement request; digital card available in Apple/Google Pay immediately; physical card in 3–5 business days
Transaction dispute (Reg E)	Customer initiates dispute with transaction details; provisional credit within 5 business days; written resolution within 10 business days

---

Consumer Account Opening (Blend Integration)

- **Checking and Savings** accounts can be opened fully online via Blend
- Identity verification: Okta identity + Experian CIP check + Knowledge-Based Authentication (KBA)
- CIP document upload: government-issued ID (driver's license or passport)
- Initial funding: debit card (Adyen) or ACH pull from an external bank

- Account record created in AS/400 via BIH after Blend approves the application

---

Notifications & Alerts

- **Balance threshold alerts**: customer sets a below/above threshold (e.g., "alert me if checking drops below $500")
- **Large transaction alerts**: default $500; configurable
- **Failed login / account lockout**: immediate push + email
- **Fraud alert from Actimize**: immediate push + SMS
- **CD maturity approaching**: 60-day, 30-day, 7-day
- **ACH return / wire failure**: same-day notification
- All notifications respect customer channel preferences (push / SMS / email); managed in the Customer Service profile

---

Security

- Account lockout: **5 consecutive failed logins** → account locked; unlock via verified phone call or branch visit
- Session timeout: 10 minutes inactivity (online banking); 5 minutes (mobile)
- All events logged to Audit Service (SOX + BSA compliance)

Business Rules Specific to Retail

1. Available balance is always sourced from FiServ Open Solutions API (real-time); book balance is never shown to the customer
2. ACH operations must be **queued and retried** around AS/400 batch windows (midnight–4 AM CT, 6 PM CT EOD)
3. Zelle first payment to a new recipient: **15-minute hold** before funds are released to the recipient
4. Customer may not initiate a Savings withdrawal that would exceed the **Reg D 6-withdrawal limit**; the 7th attempt is hard-blocked with a message to contact the branch
5. Dispute provisional credit must be applied within **5 business days** of a Reg E dispute being submitted
6. Wire initiation via the retail portal is submitted to the **Wire Desk** for manual review and release (not processed automatically)
