Pinnacle Properties Group — Enterprise Domain Context

About the Organization

Pinnacle Properties Group is a large independent residential real estate brokerage with **3,200 active licensed agents** across two states. The company operates **28 regional offices** — 18 in Texas and 10 in Florida — and closed approximately **18,500 transactions** in the prior fiscal year representing **$6.2 billion in gross sales volume**.

Pinnacle is fully independent (not a national franchise), which means its commission structures, compliance workflows, and technology decisions are entirely self-determined. The brokerage employs a **Broker of Record** in each state who holds legal responsibility for all agent activity.

DealDesk is the internal platform being built to consolidate all agent-facing and brokerage-admin operations. Today, operations run across four disconnected systems: **dotloop** (documents), **Follow Up Boss** (CRM), **QuickBooks Online** (accounting), and a home-grown Excel/Google Sheets transaction tracker. DealDesk replaces all of these.

Two product teams build DealDesk:

- **Agent Experience Team** — agent-facing portal: onboarding, licensing, cap tracking, and performance dashboard
- **Transaction Management Team** — transaction lifecycle, commission engine, CDA workflow, and compliance document vault

---

Enterprise User Personas

Persona	Team	Description
Buyer's Agent	Agent Experience	Represents buyers; manages showings, offers, and closing coordination
Listing Specialist	Agent Experience	Represents sellers; manages listing creation, pricing, and open houses
Transaction Coordinator (TC)	Transaction Management	Manages the document and milestone lifecycle of each transaction
Branch Manager	Both	Manages a regional office; agent production, compliance, recruiting
Broker of Record	Transaction Management	Licensed broker holding state-level legal responsibility; approves CDAs and dual agency
Recruiting Admin	Agent Experience	Manages incoming agent applications and onboarding pipeline
Accounting / Finance	Transaction Management	Disburses commissions, reconciles with QBO, manages cap tracking

Agent (General)	Both	Any active licensed agent; may play buyer or listing role depending on transaction

---

Commission Structures

Pinnacle supports four commission plan types. Every agent is assigned exactly one plan at onboarding, adjustable at anniversary.

Plan	Description
Standard Split	Agent and brokerage share gross commission at a fixed ratio for all transactions (e.g., 80/20)
Cap Model	Agent pays brokerage a percentage until reaching an annual cap, then retains 100% for the rest of the year. Cap resets on the agent's **anniversary date** (not calendar year)
Team Model	Team Lead receives an override percentage on each team member transaction; sub-agents earn a negotiated sub-split
Graduated Split	Split ratio improves in tiers as the agent crosses production milestones within the year (e.g., 70/30 up to $5M, then 75/25 from $5M–$10M, then 80/20 above $10M)

Key concepts:

- **GCI (Gross Commission Income)**: total commission dollars earned before any splits or deductions
- **CDA (Commission Disbursement Authorization)**: formal per-transaction document specifying exactly how gross commission is split; must be countersigned by the Broker of Record before any disbursement
- **Cap Tracking**: year-to-date brokerage-side commission paid by a cap-model agent; tracked against individual cap amount; resets on anniversary date
- **E&O (Errors & Omissions Insurance)**: required for all active agents; Pinnacle tracks individual expiry; expired E&O automatically blocks the agent from creating new transactions

---

Agent Lifecycle

```
RECRUIT → PRE-LICENSE → LICENSE PENDING → ONBOARDING → ACTIVE → TOP PRODUCER → TEAM LEAD
```

- **RECRUIT**: prospect in the recruiting pipeline; no portal access
- **ONBOARDING**: new agent completing required setup steps before being permitted to transact
- **ACTIVE**: fully licensed and onboarded; can create and participate in transactions
- **Top Producer** and **Team Lead** are earned statuses based on production milestones

---

Transaction Types

Type	Description

Buyer Representation	Agent represents the buyer; buyer's agent commission typically paid by seller
Seller / Listing Representation	Agent represents the seller; listing agent earns listing-side commission
Dual Agency	Single agent or same brokerage represents both buyer and seller; requires written consent from both parties; state disclosure rules apply
Referral-In	External brokerage refers a client to Pinnacle; referral fee paid back to referring brokerage (capped at 35% of gross commission)
Referral-Out	Pinnacle agent refers a client to another brokerage; Pinnacle earns a referral fee
New Construction	Agent represents buyer of a new-build home; builder typically pays buyer's agent; separate document checklist

---

Enterprise Compliance & Regulatory Framework

State Licensing

- **Texas**: TREC (Texas Real Estate Commission) — agents must hold a valid TREC license; continuing education (CE) tracked; license expiry = agent blocked from new transactions
- **Florida**: FREC (Florida Real Estate Commission) — equivalent to TREC; separate license number; CE requirements differ by license type
- **Broker of Record**: licensed Broker of Record required in each state; responsible for all agent conduct and document compliance

RESPA / TRID

- For purchase transactions with a mortgage: DealDesk must track the **Closing Disclosure (CD) delivery date** and enforce the **3-business-day waiting period** before closing
- Compliance alert raised if closing date falls within the 3-day waiting period

Fair Housing Act

- Annual Fair Housing training required for all agents; DealDesk tracks completion date and blocks transactions for agents with overdue training (Phase 2)

Document Retention

- All transaction documents retained for **7 years** (S3 Standard for years 1–3; S3 Glacier for years 3–7)

Enterprise Integration Landscape

System	Purpose	Primary Team
NTREIS	Dallas-Fort Worth + North Texas MLS (RESO Web API)	Transaction Management
HAR	Houston MLS (RESO Web API)	Transaction Management

Stellar MLS	Florida MLS (RESO Web API)	Transaction Management
DocuSign	E-signatures on CDAs, listing agreements, disclosure forms	Transaction Management
Stripe Connect	Commission disbursements to agent bank accounts	Transaction Management
QuickBooks Online (QBO)	Accounting sync per closed transaction	Transaction Management
Follow Up Boss	Legacy CRM (read-only sync, Phase 1 only; deprecated Phase 2)	Agent Experience
Calendly	Showing appointment scheduling (Phase 1 embed in agent portal)	Agent Experience
TREC API	Texas license verification and CE status	Agent Experience
FREC Portal	Florida license verification	Agent Experience
